

hub + app

➤ Accessories

We have created a range of smart accessories to enhance your energy saving experience:

➤ Relay & Sensor ➤ CT Clamp ➤ app ➤ hub

📱 app Features

Free to download on Android & IOS

- Remotely control & monitor on your mobile device
- Change your zappi charging modes
- Pre-set your heating & hot water of your eddi
- Remotely manually boost your eddi or zappi
- Adjust zappi minimum green charging level
- Observe domestic live energy flow
- View consumption, generation and diverted energy data
- Hub device required to use the app

📱 hub Features

Remotely control & monitor your myenergi devices.

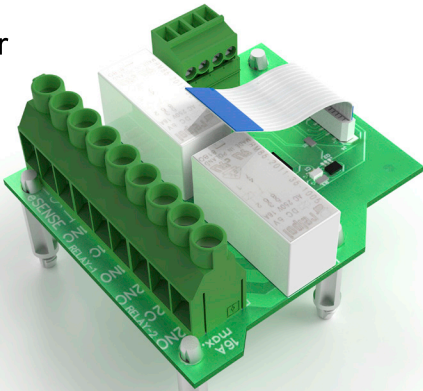

- Comes with ethernet cable for direct connection to your internal router
- Comes with mains power supply system displayed on the LCD display of your product. You'll need an additional CT. (additional option)
- Remotely control & monitor your myenergi devices
- Access to the latest firmware updates
- Device status LEDs
- Will support time of use tariffs in the near future

In some cases extra CT clamps are required i.e for 3 phase installs.

Smart accessories to make life simpler

Relay & Sensor Board

CT Clamp

eddi Relay & Sensor Board Features

eddi has the option to install a Relay & Sensor board, this allows for many different wiring configurations.

- ⊗ Two independent multi-function relays (16Amp)
- ⊗ eSense input (isolated 230V detection for low tariff etc.)
- ⊗ Two temperature sensor inputs (PT1000)
- ⊗ Export Threshold
- ⊗ Import Threshold
- ⊗ Operate when heating
- ⊗ De-stratification pump control
- ⊗ Timed operation
- ⊗ Fault signal for BMS systems

The two relays can be independently set for several different functions, or they can be set to operate as a pair.

CT Clamp Features

zappi & eddi come with one wired CT clamp as standard.

- ⊗ If you would like to see real-time generation from your solar/wind system displayed on the LCD display of your product. You'll need an additional CT. (additional option)
- ⊗ The 22kW 3-phases zappi come with 3 CTs as standard.

In some cases, extra CT clamps are required i.e for 3 phase installs.
